

SRI HARISH K

Cybersecurity Enthusiast | Forensic Analyst

+91 7871138827 | sriharishkiruba@gmail.com | [sri-harish-k-06s11s](https://sri-harish-k-06s11s.github.io)

SUMMARY

Driven and detail-oriented B.E. Cybersecurity student with hands-on experience in ethical hacking, digital forensics, and embedded system security. Proficient in identifying system vulnerabilities, securing web applications, and simulating advanced attack scenarios using tools like Burp Suite, Nmap, and Wireshark. Skilled in Python programming, security automation, and custom tool development.

Successfully led CTF challenges, built secure microcontroller-based projects, and developed encryption-driven communication systems. Passionate about safeguarding cloud platforms, AI-powered ecosystems, and digital infrastructure against emerging cyber threats. Known for strong problem-solving abilities and proactive security mindset.

INTERNSHIPS

Cybersecurity Intern – Cyfotok Infosec

Aug 2024 - Sep 2024

- Worked under experienced analysts on vulnerability assessments, network security, and threat modeling.
- Contributed to security improvements and participated in tool evaluations.

Digital Forensics Intern – Cyber Crime Police Station, Puducherry

Jan 2025 - Feb 2025

- Supported live forensic investigations and evidence processing.
 - Assisted in identifying digital traces and documenting findings for case use.
 - Played a key role in identifying digital traces and meticulously documenting findings for case-related purposes.
-

EDUCATION

Mahendra Engineering College, Namakkal

2022 - 2026

BE (Bachelor of Engineering) in Cyber Security

Holy Cross Matric Higher Secondary School

2020 - 2022

HSC in Biology

TECHNICAL SKILLS

- **Programming Languages:** Python, HTML, CSS, Java
 - **Cybersecurity Tools:** Nmap, Wireshark, Metasploit, Burpsuite
 - **Operating Systems:** Linux, Windows
 - **Microcontrollers:** ESP32, Raspberry Pi Pico, Arduino
 - **CTF Competence:** Advanced CTF player & flag creator; skilled in web, crypto, OSINT, and forensic challenges
 - **Focus Areas:** Ethical hacking, digital forensics, embedded systems, penetration testing
-

PROJECT

Text to Emoji Encryption & Decryption using RSA

- Created an emoji-based secure messaging system using RSA for encrypted communication.
- **Published in:** IJMRSET, Volume 8, Issue 5
- **Title:** "A Secure Emoji-based Communication System Using RSA Encryption and Blockchain for Stealthy Message Transmission"

WiFi Deauther (ESP32)

- Developed a tool to simulate deauthentication attacks on WiFi networks for testing purposes.
- Integrated a web-based interface for real-time control and monitoring of attack parameters.

USB Rubber Ducky (Raspberry Pi Pico)

- Programmed automated keystroke injection scripts for pentesting via USB emulation.
- Simulated real-world attack scenarios by deploying payloads that demonstrate the risks of physical access to unsecured endpoints.

URL Redirect Detector

- Built a web-based tool to detect and trace URL redirections to reveal final destination links.
 - Integrated with threat intelligence APIs to flag malicious or shortened links.
 - URL Redirect Detector (Python + Flask + VirusTotal API)
-

VOLUNTEER

Student Coordinator – Workshop: The Role of AI in Cybersecurity

- Coordinated an inter-departmental workshop with over 150 participants.
- Assisted in speaker logistics and student engagement activities.
- Facilitated networking sessions that fostered meaningful connections and collaborations among attendees.
- Conducted post-event surveys to gather feedback, resulting in valuable insights for future improvements and increased satisfaction rates

Speaker – Visual Vortex: Video Crafting Skills

- Conducted an interactive session on video editing and content creation for 250+ students.
- The session was filled with excitement as students participated in hands-on activities and explored various editing tools.
- Students collaborated on projects, exchanging ideas and techniques to craft compelling narratives and enhance visual aesthetics.
- By the end of the session, attendees left inspired, equipped with newfound skills to bring their unique visions to life in the digital world.

Organizer – CTF: WHO AM I

- Organized a college-wide CTF (Capture The Flag) competition.
 - Designed creative and challenging CTF flags in categories such as OSINT, crypto, and forensics.
 - Mentored teams, reviewed submissions, and ensured the smooth execution of the event.
 - Developed and launched an official event website (cybersentinel-ctf.netlify.app) and hosted custom challenges on TryHackMe to provide a hands-on, interactive platform for participants
-

DECLARATION

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief.
